Art Unit: 1614

Claims 12, 17, 18-33 are presented for examination.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12 and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Japanese Patent Abstract 6199690.

The Japanese Patent Abstract teaches the use of isquercetin and vitamin C in a pharmaceutical formulation for activating cerebral metabolism and improving memory and cerebral function. The above reference differs from the claimed invention in the proportions of isoquercetin and vitamin C. It would have been obvious to a person skilled in the art to determine the proper proportions or amounts of active ingredients, considering that the determination of such proportions is considered to be within the skill of the artisan in the absence of evidence to the contrary. One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to the use the isoquercetin in combination with vitamin C in improving cerebral function. The determination of optimum proportions or amounts is considered to be within the skill of the artisan. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention and as such claims 12 and 30-33 are properly rejected under 35 U.S.C. 103.

Claims 17 and 21-29 at present time are considered to be allowable.
